The screenshot shows the Windows 10 desktop with a taskbar at the bottom. On the desktop, there are icons for 'This PC', 'Recycle Bin', 'Adobe Reader 8', 'Mozilla Firefox', 'VLC media player', and 'Google Chrome'. A window titled 'System' is open, showing the 'Control Panel > System and Security > System' path. The window displays system information such as 'Windows edition: Windows 10 Pro', 'Processor: Intel(R) Core(TM) i3-2328M CPU @ 2.20GHz', and 'Installed memory (RAM): 4.00 GB'. The 'Advanced system settings' link in the left sidebar is circled in red. Red text annotations are overlaid on the window: '1. right click on THIS PC' and 'select SYSTEM PROPERTIES' are positioned over the top right, and '2. select this' is positioned over the circled 'Advanced system settings' link. The taskbar at the bottom includes the Start button, a search bar, and several application icons. The system tray on the right shows the date and time as '1:42 PM 8/29/2018'.

**1. right click on THIS PC**  
**select SYSTEM PROPERTIES**

**2. select this**

# Step : 11

The screenshot shows a Windows 10 desktop with a taskbar at the bottom containing icons for This PC, Recycle Bin, Adobe Reader 8, Mozilla Firefox, VLC media player, and Google Chrome. A 'System Properties' dialog box is open, displaying the 'Advanced' tab. The 'Performance' section is expanded, showing 'Visual effects, processor scheduling, memory usage, and virtual memory'. The 'Settings...' button is highlighted. The 'User Profiles' section shows 'Desktop settings related to your sign-in' with a 'Settings...' button. The 'Startup and Recovery' section shows 'System startup, system failure, and debugging information' with a 'Settings...' button. The 'Environment Variables...' button is circled in red. The 'System' window in the background shows system information: Intel(R) Core(TM) i3-2328M CPU @ 2.20GHz 2.20 GHz, 4.00 GB (3.87 GB usable), 64-bit Operating System, x64-based processor, No Pen or Touch Input is available for this Display, and workgroup settings: DESKTOP-DO8VGPM, DESKTOP-DO8VGPM, WORKGROUP. The Windows activation status is 'Windows is not activated.' with a link to 'Read the Microsoft Software License Terms' and a 'Product ID: 00330-80000-00000-AA862'. The 'Activate Windows' watermark is visible in the bottom right corner.

**Now select**  
**Environmental Variables**

# Step : 12

The screenshot shows a Windows 10 desktop with the 'System Properties' dialog box open, specifically the 'Advanced' tab. The 'Environment Variables' sub-dialog is also open, showing 'User variables for User' and 'System variables'. In the 'System variables' section, the 'Path' variable is selected and highlighted with a red circle. A red arrow points from the 'Edit...' button to the 'Path' variable. A red box highlights the 'Edit...' button. The background shows the Windows 10 'System' control panel window with system information like CPU, RAM, and OS details. The taskbar at the bottom shows the Start button, search bar, and several application icons.

# Step : 13

The screenshot shows a Windows 10 desktop with several overlapping windows. In the background, a Twitter profile page for 'QSpidershyderabad' is visible. Overlaid on this are four windows:

- System Properties**: The 'Advanced' tab is selected, showing options for Performance, User Profiles, and Startup and Recovery. The 'Environment Variables...' button is visible at the bottom.
- Compose new Tweet**: A window from the Twitter app, partially obscured.
- Environment Variables**: A window showing a list of system variables. The 'New' button is highlighted with a red box and a pink arrow pointing to it.
- Edit environment variable**: A dialog box for adding a new environment variable. The text area contains the following paths:
  - %SystemRoot%\system32
  - %SystemRoot%
  - %SystemRoot%\System32\Wbem
  - %SYSTEMROOT%\System32\WindowsPowerShell\v1.0\
  - %SYSTEMROOT%\System32\OpenSSH\

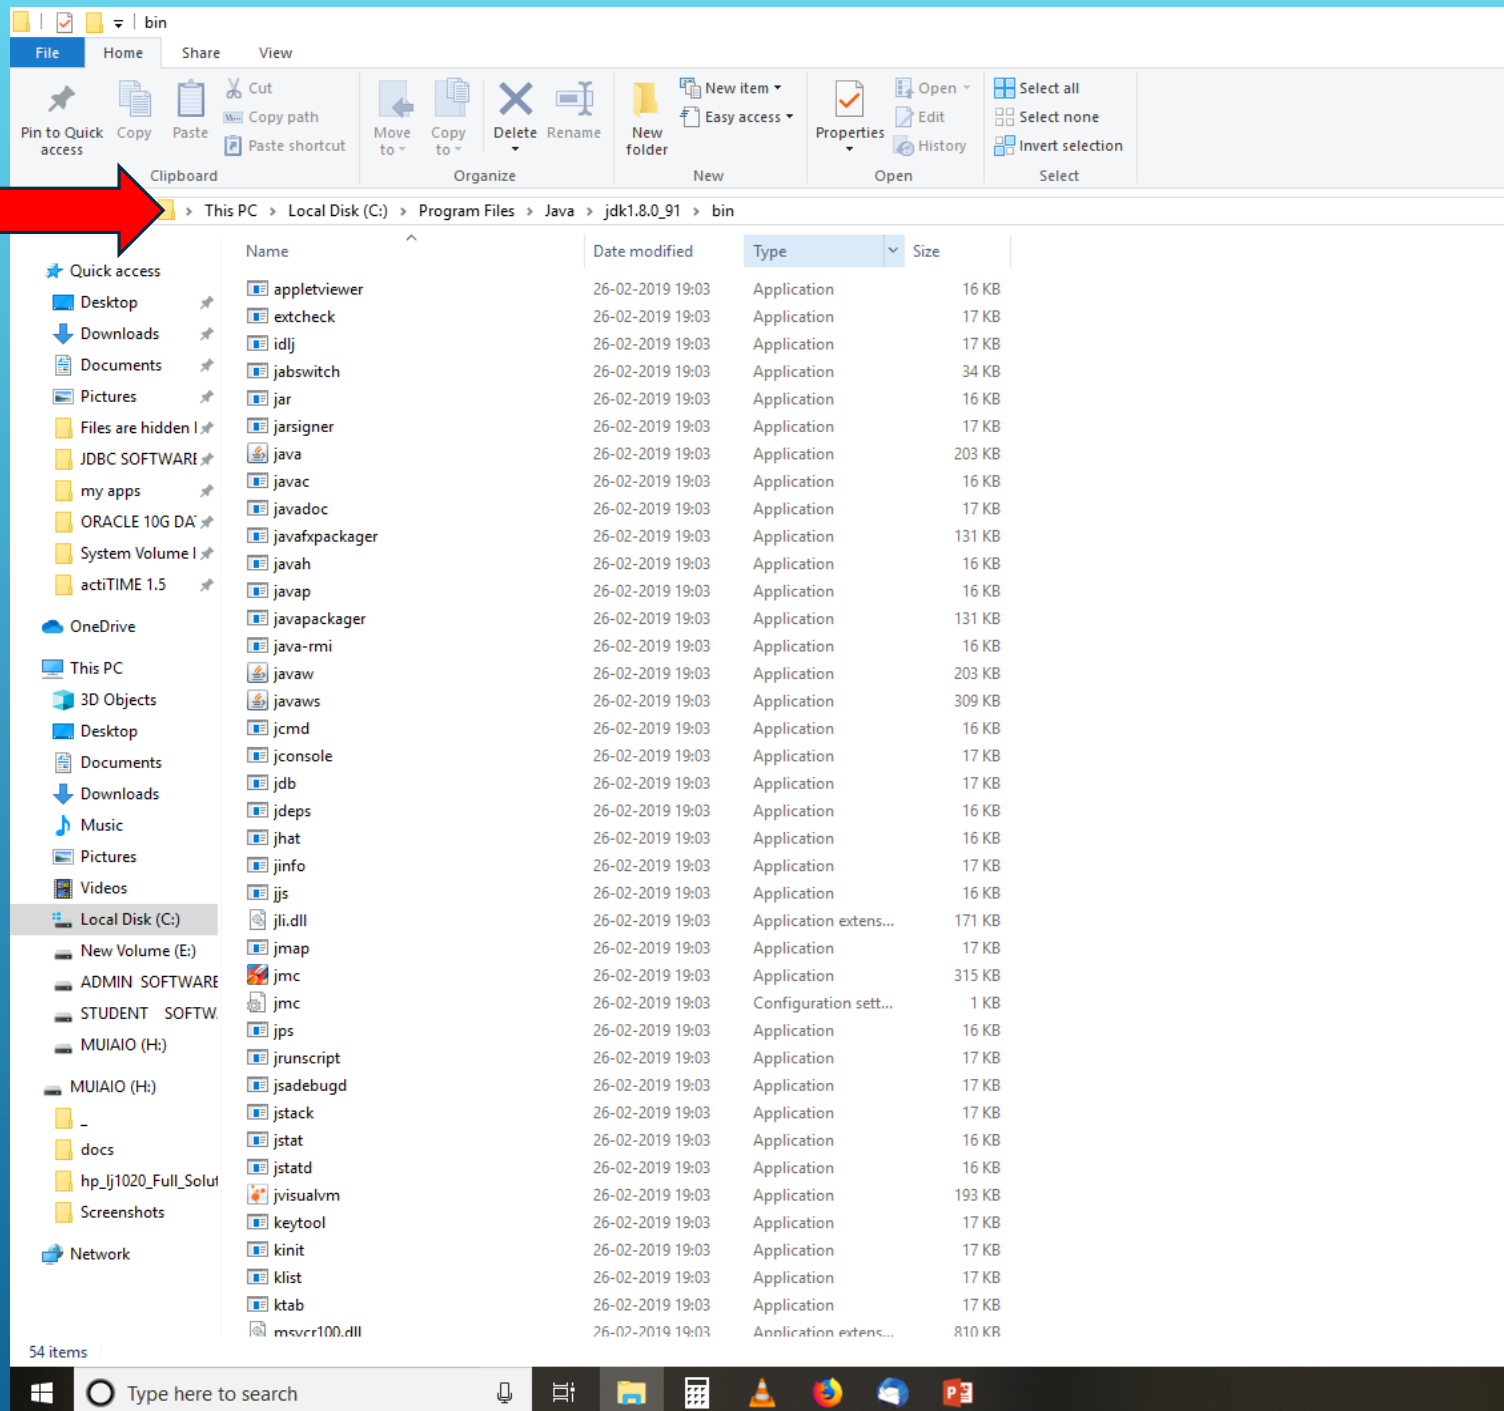

The Windows taskbar at the bottom shows the Start button, a search bar, and several pinned application icons. The system tray on the right indicates the date and time as 19-06-2019, 09:46.

# Step : 14

Copy  
the  
path

## NOTE :

Go to file explorer  
(WIN Key + E)  
Open local disk (C)-  
programfiles-java-  
jdk folder-BIN

# Step : 15

The screenshot shows a Windows 10 desktop with several windows open. The background is a Twitter page. Overlaid windows include:

- System Properties**: The 'Advanced' tab is selected, showing 'Performance' and 'User Profiles' sections. The 'Environment Variables...' button is visible at the bottom.
- Compose new Tweet**: A window for composing a new tweet, partially obscured by other windows.
- Environment Variables**: A window showing a list of system environment variables. The 'Path' variable is selected.
- Edit environment variable**: A window for editing the selected variable. It contains a list of paths, including '%SystemRoot%\system32', '%SystemRoot%', '%SystemRoot%\System32\Wbem', '%SYSTEMROOT%\System32\WindowsPowerShell\v1.0\', '%SYSTEMROOT%\System32\OpenSSH\', and 'C:\Program Files\Java\jdk1.8.0\_91\bin'. A green box with the text 'PASTE the copied path here' and a red arrow points to this window.

At the bottom of the 'Edit environment variable' window, there are 'OK' and 'Cancel' buttons. A green box with the text 'Then Click on OK' and a blue arrow points to the 'OK' button.

# Step : 16

2. Then Click on OK

1. Then Click on OK
